PREVENTION & MAINTENANCE

While A-dec equipment doesn't require a lot of maintenance, it benefits from periodic inspection and replacement of wear items just like any other equipment. This section offers a list of recommended service items to keep with you, reducing multiple office visits.

A-dec 360 preventive kits are designed to maintain A-dec equipment. The kits simplify service and eliminate guesswork by packaging recommended items into individual kits (or kit sets) for annual maintenance.

Online, you'll find convenient checklists:

UPGRADES & ACCESSORIES

A-dec 360 upgrades and accessories offer versatility and growth in existing offices. Whether it's adding field installable options such as LED touchless sensor upgrade kits, replacing worn items such as trays or instrument pads, or refreshing the operator's with new upholstery, A-dec supports equipment long after the initial installation.

SERVICE & REPAIR

A-dec 360 service and repair items provide easy repair at the right level.

For simple items, we offer singles or packages for convenient installation. More complex repairs include all required A-dec parts and easy-to-read instructions to ensure that the repair is comprehensive and robust.

In addition to superior customer service, authorized A-dec dealers can access product support through multiple channels, all available through **a-dec.com/dealer-portal**.

Orders and Returns

WELCOME

Your *2024 A-dec 360 Parts and Performance Catalog* will help service technicians and dealership parts ordering specialists find the right parts quickly.

HOW TO FIND WHAT YOU NEED

Service parts are shown under general product or functional categories.

General product - These categories are at the model level, like chairs, lights and stools.

Functional parts - Includes sections like Fittings, Valves, and Tubing. Functional parts are often used in multiple products and look similar enough to another part that side-by-side comparison makes it easier to order the correct part.

HOW TO ORDER

EQUIPMENT ALTERATIONS POLICY/DISCLAIMER

Modifications or alterations of A-dec equipment that expand the use of A-dec equipment beyond its design and intent, or override any safety feature may jeopardize doctor, patient, or staff safety. Modifications that alter the electrical or mechanical safety of A-dec dental equipment are in conflict with Underwriters Laboratory (UL) construction file requirements and are not sanctioned by A-dec. Examples of modifications that diminish safety design include, but are not limited to: rendering access to the line voltage without the use of tools, modification of supporting elements that increase or shift loading characteristics, and the addition of any powered device that exceeds the design limits of the dental system.

The use of accessory equipment that does not comply with the safety requirements of A-dec dental equipment may lead to a reduced level of safety of the resulting system. It is the responsibility of the equipment distributor and the installer, not A-dec, to comply with all building code requirements in the installation of equipment. It is the responsibility of the person(s) who requests, approves, or performs any equipment modification or alteration to comply with all safety requirements and recommendations. A-dec will not respond to inquiries on an individual basis. Modifications or alterations of A-dec dental equipment are at your own risk. You will indemnify and defend A-dec from any resulting claims, including product liability claims, that may arise from any alterations, modifications, or installation contrary to this policy. Additionally, such modification or alteration voids A-dec's applicable product warranty and may invalidate UL or other regulatory agency approvals.

IMPORTANT NOTICE REGARDING YOUR CONSUMER RIGHTS

The benefits given to you under this warranty are additional to other rights and remedies that you may have in relation to your purchase and use of the goods to which this warranty relates. Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure. As our goods are not of a kind ordinarily acquired for personal, domestic or household use or consumption, we are permitted to limit our liability under the Australian Consumer Law for failure to comply with certain guarantees, where it is fair and reasonable to do so, to one or more of the following: (i) the replacement of the goods or supply of equivalent goods, (ii) the repair of the goods, (iii) the payment of the cost of replacing the goods or of acquiring equivalent goods, or (iv) the payment of the cost of having the goods repaired. A-dec Australia provides no warranty against defects beyond the rights and remedies given under this express limited warranty and those which are available under the Australian Consumer Law.

O-rings

Use A-dec O-rings

A-dec o-rings are made from specific ethylene propylene (EP), fluorocarbon (Viton) and nitrile (Buna N) compounds to provide the best performance. We recommend the use of A-dec o-rings in your A-dec equipment.

A-dec's silicone lubricant is a high quality silicone-based grease. It is ideal for lubricating A-dec o-rings. Before installing o-rings, always apply a light coating of silicone lubricant. This makes the installation of the o-ring easier and prevents the o-ring from being damaged. A-dec silicone lubricant is available in a package of 6 as Part Number 98.0090.01.

The use of petroleum-based lubricants (jellies, creams, or lotions) cause the o-rings in the syringe to swell and/or deteriorate, resulting in syringe malfunction or failure.

O-ring names

O-ring names, which appear on acknowledgements and invoices, provide the following informative descriptions:

Service Tip

A-dec's silicone lubricant is a high quality silicone-based grease. It is ideal for lubricating A-dec o-rings. Before installing o-rings always apply a light coating of silicone lubricant. This makes the installation of the o-ring easier and prevents damage to the o-ring. A-dec silicone lubricant is available in a package of 6 as Part Number 98.0090.01.

Caution

The use of petroleum-based lubricants (jellies, creams, or lotions) causes the o-rings in the syringe to swell and/or deteriorate, resulting in syringe malfunction or failure.

Tips and Retainers

Use Only A-dec Syringe Tips

Use of syringe tips manufactured by a company other than A-dec may result in damage to the o-rings inside the syringe tip retainer assembly. Damage to these o-rings can result in syringe tip ejection. Many disposable syringe tips have sharp corners on the water tube, which cut the o-ring sealing the water from the air in the tip.

To help you easily identify genuine A-dec syringe tips, a distinguishing "A-dec" mark is located above three grooves on each tip. A-dec syringe tips also have a bright nickel chrome finish.

The nickel chrome finish on A-dec's syringe tips is not affected by cleaning solutions containing ammonia or amines. While A-dec tips are not affected by these solutions, we discourage the use of these chemicals when cleaning A-dec or any other manufacturers' syringe tips since tips from different manufacturers are often mixed together in the dental office.

- A $\frac{5}{32}$ " hex wrench for removing and installing the syringe tip insert

Service Tips

USE ONLY A-DEC SILICONE LUBRICANT (98.0090.01)

Using petroleum-based lubricants (jellies, creams, or lotions) causes the o-rings in the syringe to swell and/or deteriorate, resulting in syringe malfunction or failure.

USE ONLY A-DEC SYRINGE TIPS

Using disposable syringe tips or tips manufactured by a company other than A-dec may result in damage to the o-rings inside the tip retainer nut assembly. Damaged o-rings may result in syringe tip ejection.

Identify genuine A-dec tips by the "A-dec" located above three grooves on each tip.

Service Tip

WATER LEAKS FROM HANDPIECES AFTER REMOVING FOOT FROM FOOT CONTROL

Some water leaks can be caused by pinched foot control tubing, which blocks the exhaust exit out of the foot control and traps the water coolant signal.

REMINDER: TROUBLESHOOTING AN ACTIVE FOOT CONTROL

Before removing the foot control disc, move the master On/Off toggle to the OFF position and bleed the system of air pressure. This prevents the foot control stem from being forcefully ejected from the Foot Control II valve.

If the air supply to the foot control must be active while testing, before moving the master On/Off toggle to the ON position, ensure that the stem assembly in the foot control valve cannot be ejected.

A-dec Manufactured Cylinders

From the raw materials to the finished assembly, A-dec manufactures hydraulic chair cylinders completely in-house.

Once machined, the components are assembled in a special room to keep debris from entering the cylinder. Then we cycle test each cylinder using ultrasonics to verify the integrity of the internal seals and perform a high pressure test up to 1500 psi. To make certain it performs flawlessly in the chair, A-dec tests each cylinder through more cycles during final chair assembly.

A-dec warrants its chair cylinders, both lift and tilt, for 10 years from the date of purchase of the chair or the cylinder.
